

INVASIVE

Spongy moth

Lymantria dispar dispar

- When I am a caterpillar, I feed on over 300 species of trees and cause the trees to lose their leaves.
- My eggs are laid in a mass that contains 100-1000 eggs! I typically lay these eggs on vehicles or shipping containers, which allow me to spread very easily.
- As a caterpillar, I am black and brown in colour with two rows of blue and red spots going down my back. fragments.
